

**Practical-7:** Plugins with their properties.

**Definition:** Create a design using various plugins in Figma, like iconify, Unsplash, gradient and wave plugins.

**Solution:**

**Working:**

- First, open Figma. Add a new Figma design file.
- Rename a file as 210\_Practical-7\_Plugins.
- In this design, the following tools are used for a particular operation:

Tools Name	Use	Properties
<b>Android Medium-1</b>	The Android Medium-1 is used as a Frame for this design. Applied an Image of BMW Car using Unsplash Plugin.	Width: 1027px Height: 810px Image: 100% Linear: 100% Opacity: 100%
<b>Text-Box</b>	Used to write on it. Applied Gradient+ Plugin.	Width: 583px Height: 203px Corner radius: 0px Linear: 100% Opacity: 100% Size: 63 Extra Bold Inter
<b>Waves</b>	Used to draw waves. Using Get Waves Plugin.	Width1: 1027px Height1: 185px Width2: 1027px Height2: 185px Opacity: 100% Corner Radius: 0 Linear: 100% Stroke: #000000 100%
<b>Icon</b>	Used to show BMW Symbol. Using Iconify Plugin	Width: 194px Height: 194px Opacity: 100% Corner Radius: 0 Stroke: #000000 100% Color-1: #000000 Color-2: #3F000000

- Export your design as a JPEG file.
